## WHO WE ARE

LGI is the Defense Ministry's supervision of the managing authority, in public policy, and Geodesy cartography of geospatial information.

---

## OPEN DATA

Public availability of the data in an open manner has one of the e-government policy framework for 2014-2020 year planning period of development.

Open access can be extended to all the information a public authority publishes, such as public records and public information system for the public, research, statistics, tables, etc.

**According to the fundamental principles of open data, the information is available:**

- free
- Online
- machine readable format
- GDB, SHP files
